

Anjali Sinha

Full Stack Web Developer

PROFESSIONAL SUMMARY

A full stack web developer specialized in MERN stack, like to write code clean and optimized, experienced in executing solo and collaborative projects. Possesses strong problem-solving abilities, keen attention to detail, and a passion for crafting exceptional web solutions.

PROJECTS

1. Spotify Clone | |

React | Redux | css | axios | redux-thunk

- Developed a fully functional Spotify clone using React, Redux, and CSS
- Implemented features like Navigation Menu, Product Highlights, Search Bar, Promotions and Offers, Social Media Links, Customer Support, Quick Links, and more
- Worked individually to design and build the Home Page

2. Plant order Application | |

HTML | CSS | JavaScript | Firebase

- Developed a fully functional e-commerce website using HTML, CSS, and JavaScript
- I implemented a product page featuring a variety of plants and gardening supplies, incorporating functionalities for sorting and filtering, with data being retrieved from an API
- Ensured a user-friendly experience with browsing, searching, cart management, secure checkout, and user accounts.
- Created a responsive design for optimal user experience on both mobile and desktop devices
